IZAR@MOBILE

SOFTWARE

APPLICATION

IZAR@MOBILE is designed for mobile meter reading and configuration of system components and smart meters. It runs on IZAR POCKET, PC or definite mobile PCs. The measuring data is received from the Bluetooth Receiver and can be transmitted to the IZAR@NET meter management software. The configuration of system devices can be done together with IZAR OPTO HEAD BLUETOOTH.

FEATURES

- Mobile walk-by or drive-by reading of all types of resource meters (water, heat, cold, gas, electricity)
- Speeds up your meter data collection
- Handling of Wireless M-Bus and OPEN METERING Protocol telegrams
- Ad hoc and guided tours
- Manual entry of meter data
- Import and export of tours and data
- Filtering and sortation of reading data
- Configuration of system devices and smart meters
- User rights management
- Different languages settable
